Summary

Computer Science and Engineering student specializing in Data Engineering and NLP. Prior experience in computer networking, RF communication. Contributed to BRAC University's Mars Rover team that placed 7th world wide and 2nd South Asia at the University Rover Challenge (URC 2026). Currently Sub-Team Lead in Network & Vision. Built mesh setup of 5.8GHz radio with failsafe configuration and video streaming pipelines (FFmpeg, Gstreamer), telemetry systems. Experienced in leading some international teams, mentoring peers and delivering projects on schedule.

Experience

BRACU MONGOL TORI (Mars Rover Team)

Network & Vision Sub-Team Lead

- Responsible for the rover's communication and vision system.
- Designed a resilient multi-link(433MHz, 900MHz, 2.4GHz, 5.8GHz) RF communication system for rover-base station connectivity.
- Managed sub-team workflows and project timelines utilizing Kanban methodologies to ensure efficient delivery.

Contributor

- Developed a Python-based telemetry dashboard for centralized monitoring of rover systems.
- Designed and implemented the rover's video-streaming architecture using FFmpeg and GStreamer.
- Design competition restriction Mesh and fallback setup.

BRACU ALTER (Rescue Rover Team)

Team Manager

- Managed end to end project execution , team coordination and fund raising

BRACU SRIJON (BRAC-Certified Teaching Initiative)

ICT Teacher

- Delivered ICT workshops and hands on computer skills training to secondary school students of under privileged schools.

BRAC University Computer Club

Senior Executive

- Organized technical workshops and intra university hackathon, competitive programming contest.
- Mentored student teams in the planning and execution of hands-on technical projects, providing guidance throughout the development lifecycle.

Projects and Research Experience

Quantifying Boilerplate Leakage in Privacy Policy Classification

Independent research (ongoing)

- Analyzing training leakage of boilerplate in privacy policy in Bangladesh.

Backdoor Detection in Deep Neural Networks

Independent research (ongoing)

- Investigating trigger-independent backdoor detection through neuron-activation and weight analysis, using the TrojAI and BackdoorBench datasets.

Education

BRAC UNIVERSITY

Oct 2023- Apr 2027(Expected)

BSc in Computer Science and Engineering

CGPA - 3.5(Expected)

St. JOSEPH HIGHER SECONDARY SCHOOL

2022

HSC (Science)

GPA- 5.00

SHAHEED POLICE SMRITY COLLEGE

2020

SSC (Science)

GPA- 5.00

Skills

- Programming & Tools: Python, MySQL,Tableau,Bash, Git, Linux, FFmpeg, GStreamer.
- Project & Team: Kanban task tracking, Jira, Cross-Team coordination, mentoring, workshop delivery.
